The App will use only the mantissa portion of the rating:

- For example, the rating of '5.7' will be represented by, and used in averaging calculations as just '7'
- Letter ratings will stand for the following: {a: 0, b: 25, c: 50, d: 75}
- So, 5.11d will be represented by, and be used in averaging calculations as '11.75'
